Report on English Language Lab

A Language Lab is one of the best sources to learn a foreign language. In KVS (RO) Chandigarh initially English Language Labs were installed for classes (3rd to 9th) in December 2017. The printed material in the form of various modules was also provided to the schools for assisting the teachers to inform the students about the activity they had to perform on computers. A specific timetable for the language lab is arranged and block periods (once in a week to every class) are given. All the students from classes 3rd to 9th are registered online and their ID's are generated so that they can use the software through their ID's and keep a record of the work done online. The content available in the software is highly rich and practically useful. Students play word games, solve comprehensions, grammar games, vocabulary enrichment activities. They can stop, start, rewind and repeat the activity they do online for learning the language. The software is updated from time to time and new things are incorporated. Establishing English language labs in schools is a highly productive and commendable move on the part of KVS for enhancing the performance of its students in English Language.
